BENINCA[®]
TECHNOLOGY TO OPEN

UNIONE NAZIONALE COSTRUTTORI
AUTOMATISMI PER CANCELLI, PORTE
SERRANDE ED AFFINI

AVVERTENZE - WARNING - HINWEISE ATTENTION - ADVERTENCIAS - OSTRZEŻENIA

E' obbligatorio lasciare un'extra corsa di 10mm in chiusura e 15mm in apertura per evitare che lo stelo vada in battuta meccanica all'interno del tubo. Rispettare le quote di installazione indicate in Figura 3.

An extra-stroke of 10 mm in the closing phase and of 15mm in the opening phase are required in order to avert that the rod hits the inside of the tube. Keep to the installation dimensions shown in Fig. 3.

Einen Extrahub von 10 und 15 mm muss beim Öffnen bzw. beim Schließen laut Vorschrift vorgesehen werden, um zu vermeiden, dass der Schaft im Inneren des Rohrs anschlagen kann. Die Installationsmaße der Abbildung 3 einhalten.

Il est obligatoire de laisser une course extra de 10 mm en fermeture et de 15 mm en ouverture à fin d'éviter que la tige aille en buté mécanique à l'intérieur du tube. Respecter les côtes d'installation indiquées dans la Figure 3.

Es obligatorio dejar una carrera extra de 10mm en cierre y de 15mm en apertura para evitar que el vástago vaya a tope mecánico dentro del tubo. Se deben respetar las cotas que se indican en la Figura 3.

Należy obowiązkowo pozostawić extra skok o wymiarze 10mm podczas zamykania i 15mm podczas otwierania, aby zapobiec mechanicznemu uderzeniu trzpienia wewnątrz rury. Przestrzegać nastaw instalacyjnych podanych na Rysunku 3.

E' obbligatorio utilizzare i rallentamenti in apertura e chiusura.

Braking in both opening and closing operations is mandatory.

Die Geschwindigkeitsabnahme beim Öffnen und Schließen ist vorgeschrieben.

Il est obligatoire d'utiliser les ralentissements en phase d'ouverture et de fermeture.

Es obligatorio utilizar las ralentizaciones para la apertura y para el cierre.

Należy obowiązkowo użyć funkcji spowalniania podczas otwierania i zamykania.

E' indispensabile che l'anta sia provvista di fermi meccanici a terra (rif. A e B).

It is mandatory that the gate leaf be equipped with mechanical stoppers fitted to the ground (ref. A and B).

Der Flügel muss jedoch mit mechanischen Anschlägen am Boden versehen sein (Ref. A und B).

Il est nécessaire que le vantail soit muni de butés d'arrêt à terre (réf. A et B).

Es indispensable que la hoja tenga topes mecánicos en el suelo (ref. A y B).

Należy wyposażać skrzydło bramy w mechaniczne ograniczniki usytuowane w podłożu (odn. A i B).

Altezza minima da terra: 200mm.

E' indispensabile l'elettroserratura nel caso di ante normali superiori ai 2.5m e nel caso di ante piene superiori ai 2.0m.

Minimum height from ground: 200mm.

The electric lock is essential in the event of standard gate leaves wider than 2.5m and of solid gate leaves wider than 2.0m.

Mindesthöhe vom Boden: 200mm.

Bei normalen Flügeln und einer Länge von 2,5 m oder bei vollen Flügeln und einer Länge von 2,0 m ist ein Elektroschloss erforderlich.

Hauteur minimum du sol: 200mm.

La serrure électrique est indispensable en cas de vantaux normaux de hauteur supérieur à 2.5m, ainsi que dans le cas de vantaux pleins de plus de 2.0m de hauteur.

Altura mínima con respecto al suelo: 200 mm.

Es indispensable la cerradura eléctrica en caso de hojas normales largas más de 2,5 m y en caso de hojas macizas largas más de 2,0 m.

Minimalna wysokość od podłoża: 200mm.

W przypadku zwykłych skrzydeł przekraczających 2,5 m lub skrzydeł pełnych powyżej 2,0 m należy zainstalować elektryczny zamek.

GENERAL INFORMATIONS

The product shall not be used for purposes or in ways other than those for which the product is intended for and as described in this manual. Incorrect uses can damage the product and cause injuries and damages.
The company shall not be deemed responsible for the non-compliance with a good manufacture technique of gates as well as for any deformation, which might occur during use.
Keep this manual for further use.

INSTALLER GUIDE

This manual has been especially written to be use by qualified fitters.
Installation must be carried out by qualified personnel (professional installer, according to EN 12635), in compliance with Good Practice and current code.
Make sure that the structure of the gate is suitable for automation.
The installer must supply all information on the automatic, manual and emergency operation of the automatic system and supply the end user with instructions for use.

GENERAL WARNINGS

Packaging must be kept out of reach of children, as it can be hazardous.
For disposal, packaging must be divided the various types of waste (e.g. carton board, polystyrene) in compliance with regulations in force. Do not allow children to play with the fixed control devices of the product.
Keep the remote controls out of reach of children.
This product is not to be used by persons (including children) with reduced physical, sensory or mental capacity, or who are unfamiliar with such equipment, unless under the supervision of or following training by persons responsible for their safety.
Apply all safety devices (photocells, safety edges, etc.) required to keep the area free of impact, crushing, dragging and shearing hazard. Bear in mind the standards and directives in force, Good Practice criteria, intended use, the installation environment, the operating logic of the system and forces generated by the automated system.
Installation must be carried out using safety devices and controls that meet standards EN 12978 and EN 12453.
Only use original accessories and spare parts, use of non-original spare parts will cause the warranty planned to cover the products to become null and void.
All the mechanical and electrical parts composing automation must meet the requirements of the standards in force and outlined by CE marking.

ELECTRICAL SAFETY

An omnipolar switch/section switch with remote contact opening equal to, or higher than 3mm must be provided on the power supply mains. Make sure that before wiring an adequate differential switch and an overcurrent protection is provided.
Pursuant to safety regulations in force, some types of installation require that the gate connection be earthed.
During installation, maintenance and repair, cut off power supply before accessing to live parts.
Also disconnect buffer batteries, if any are connected.
The electrical installation and the operating logic must comply with the regulations in force.
The leads fed with different voltages must be physically separate, or they must be suitably insulated with additional insulation of at least 1 mm.
The leads must be secured with an additional fixture near the terminals.
During installation, maintenance and repair, interrupt the power supply before opening the lid to access the electrical parts
Check all the connections again before switching on the power.
The unused N.C. inputs must be bridged.

WASTE DISPOSAL

As indicated by the symbol shown, it is forbidden to dispose this product as normal urban waste as some parts might be harmful for environment and human health, if they are disposed of incorrectly.
Therefore, the device should be disposed in special collection platforms or given back to the reseller if a new and similar device is purchased.
An incorrect disposal of the device will result in fines applied to the user, as provided for by regulations in force.

Descriptions and figures in this manual are not binding. While leaving the essential characteristics of the product unchanged, the manufacturer reserves the right to modify the same under the technical, design or commercial point of view without necessarily update this manual.

1) INTRODUCTION

Electromechanical operator to activate swing gates, available in the following models:

BILL30M: with motor powered at 230 VAC.

BILL30MA: with motor powered at 115 VAC.

For every model, the RGHT (DX) version is also available to install the system on the right gate leaf, and the LFT (SX) version is available for installation on the left gate leaf.

In case of doubt, as shown in the instruction manual, the wording DX (right) or SX (left), which identifies the different models, can be seen by opening the release handle.

For simplicity reasons, this manual shows the SX motor for left gate leaves. For the DX (right) versions, installation dimensions and instructions are the same. The main dimensions are shown in Fig. 1.

- Before installing the system, read the instruction herein.
- It is mandatory not to use the BILL 30 item for applications different from those indicated in the instructions herein.
- Supply the end user with instructions for using this system.
- The end user should receive special instruction manual.
- All Benincà items are covered by an insurance policy for damages and injuries caused by manufacture faults. It is however required that the machine bear the CE marking and original Benincà parts be used.

2) GENERAL INFORMATION

To ensure a good operation of these automatic devices, the gate to be automated should meet the following requirements:

- good strength and stiffness.
- hinges should have a minimum backlash and allow for smooth and regular manual operations.
- when closed, the gate leaves should correctly overlap for their entire height.

Warning: BILL30 is not equipped with electric limit switches or mechanical stoppers. It is mandatory that the gate leaf be equipped with mechanical stoppers fitted to the ground (Fig.2 ref. A and B).

3) TECHNICAL DATA

	BILL 30M	BILL 30MA
Motor power supply	230Vac 50/60Hz	115 Vac 50/60Hz
Absorbed rating	240W	240W
Consumption	1,1 A	2,2 A
Max. thrust	2800 N	2800 N
Operating jogging	30 %	30 %
Protection level	IP54	
Operating temperature	-20°C / +50°C	
Capacitor	8 µF	31,5 µF
Useful stroke	300 mm	
Noise	<70 dB	
Lubrication	Permanent grease	
Weight	5,7 kg	5,7 kg

4) OPERATING LIMITS

The following tables show the permitted maximum weight and width figures of the gate leaves.

Max gate leaf weight (kg)	100	300	350
Max gate leaf width (m)	2,5	2,1	1,8

In case of wind effect the limits can be significantly reduced.

5) HOW TO INSTALL THE SYSTEM

- 1) Define the height of the system from ground (the most centred possible with respect to the main door and corresponding to a rugged crossbeam).
 - 2) Weld the P plate, taking account of figures X and Y of Fig. 2/3.
 - 3) Release the actuator, as shown in the instruction manual. When the gate is closing, temporarily lock the S* bracket by keeping the K measure as per Fig. 2/3. In these conditions, the actuator must not be positioned entirely at end of stroke, but 10mm extra-stroke should be still available. By manually opening the gate leaf, check that the actuator does not hit the leaf or the pillar.
 - 4) Only after this check, carry out the final welding of the S bracket. The actuator should be perfectly flat.
- Important: the respect of dimensions indicated in Fig. 3 ensures the optimal operation of the automatic system. These different dimensions may cause malfunctions.

In any case, the manufacturer shall be held unharmed with respect to damages caused by the non-respect of the dimensions indicated.

If it is not possible to carry out welding, adjustable brackets, which can be mounted by using screws (art B.SR), are available as optional accessory. Fix the actuator to the bracket by means of screws and nuts supplied. Use washers as shown in Fig. 4.

Note: The difference between measures X and Y shall be never exceed 40mm. Greater differences cause the unsmooth movement of the gate. Dimensions M and X should be carefully checked to avert that the actuator hits the pillar (dim. M) or the leaf (dim. Z).

The total stroke of the actuator is around 320mm. The stroke, however, cannot be entirely used. An extra stroke of around 10 mm should be always provided both in the closing and opening phases.

* In the BILL 30 geared motor, the difference in height of brackets P and S shall be nil. These brackets should be therefore fitted at the same height (Fig. 1, ref. A)

6) WIRE CONNECTIONS

BILL 30 is supplied with a pre-cabled wire, around 80 cm long, to be connected to the junction box fitted to the pillar:

BLACK	Gear 1
BROWN	Gear 2
GREY	Motor, common
Yellow/Green	Earth

Note:

The motor cable shall be replaced only by an authorised assistance centre.

IT IS MANDATORY to connect the system to ground by using the special GND terminal, as provided by regulations in force.

WARNING

The insurance policy, which covers any damages or injuries caused by manufacture faults, requires that the installation comply with regulations in force and Benincà original accessories be used.

ITALIANO

Norme di sicurezza

- Non sostare nella zona di movimento della porta.
- Non lasciare che i bambini giochino con i comandi o in prossimità delle ante.
- In caso di anomalie di funzionamento non tentare di riparare il guasto ma avvertire un tecnico specializzato.

Manovra manuale e d'emergenza

In caso di mancanza dell'energia elettrica o di guasto, per azionare manualmente le ante procedere come segue:

- ruotare lo sportellino copri serratura (fig. A - rif.C);
- Inserire la chiave di sblocco fornita in dotazione e ruotarla di 90°, in senso antiorario per il motore a sinistra in senso orario per il motore a destra;
- ruotare la maniglia di sblocco come indicato in figura B (rif. M); la leva ha una posizione iniziale di stop, che va oltrepassata (clack!) per iniziare ad agire effettivamente sullo sblocco meccanico;
- portare la leva in posizione di completa apertura (circa 90° di rotazione) nella parte finale la leva opporrà una leggera resistenza.
- è ora possibile manovrare manualmente l'anta;
- per ripristinare il funzionamento automatico, riportare la maniglia nella posizione iniziale, ruotare la chiave di 90° e richiudere lo sportellino copri-serratura.

Manutenzione

- Controllare periodicamente l'efficienza dello sblocco manuale di emergenza.
- Astenersi assolutamente dal tentativo di effettuare riparazioni, potreste incorrere in incidenti; per queste operazioni contattare un tecnico specializzato.
- L'attuatore non richiede manutenzioni ordinarie, tuttavia è necessario verificare periodicamente l'efficienza dei dispositivi di sicurezza e le altre parti dell'impianto che potrebbero creare pericoli in seguito ad usura.

Smaltimento

Come indicato dal simbolo a lato, è vietato gettare questo prodotto nei rifiuti domestici in quanto alcune parti che lo compongono potrebbero risultare nocive per l'ambiente e la salute umana, se smaltite scorrettamente. L'apparecchiatura, pertanto, dovrà essere consegnata in adeguati centri di raccolta differenziata, oppure riconsegnata al rivenditore al momento dell'acquisto di una nuova apparecchiatura equivalente. Lo smaltimento abusivo del prodotto da parte dell'utente comporta l'applicazione delle sanzioni amministrative previste dalla normativa vigente.

Attenzione

Tutti i prodotti Benincà sono coperti da polizza assicurativa che risponde di eventuali danni a cose o persone causati da difetti di fabbricazione, richiede però la marcatura CE della "macchina" e l'utilizzo di componenti originali Benincà.

Safety rules

- Do not stand in the movement area of the door.
- Do not let children play with controls and near the door.
- Should operating faults occur, do not attempt to repair the fault but call a qualified technician.

Manual and emergency operation

In the event of power failure or faults, the gate can be manually operated as follows:

- turn the door covering the lock (Fig. A. – ref. C);
- Introduce the release key supplied and turn it by 90° anti-clockwise for the left motor, and clockwise for the right motor;
- turn the release handle, as indicated in figure B (ref. M); the lever has a stop initial position that must be overcome (click to be heard) to actually act on the mechanical release;
- move the lever to totally open position (around 90° rotation). Towards the end, the lever movement will be slightly stiffer.
- the gate leaf can be opened or closed by hand;
- to reset the automatic operation, move the handle to the initial position, turn the key by 90° and close the door covering the lock.

Maintenance

- Every month check the good operation of the emergency manual release.
- It is mandatory not to carry out extraordinary maintenance or repairs as accidents may be caused. These operations must be carried out by qualified personnel only.
- The operator is maintenance free but it is necessary to check periodically if the safety devices and the other components of the automation system work properly. Wear and tear of some components could cause dangers.

Waste disposal

As indicated by the symbol shown, it is forbidden to dispose this product as normal urban waste as some parts might be harmful for environment and human health, if they are disposed of incorrectly. Therefore, the device should be disposed in special collection platforms or given back to the reseller if a new and similar device is purchased. An incorrect disposal of the device will result in fines applied to the user, as provided for by regulations in force.

Warning

All Benincá products are covered by insurance policy for any possible damages to objects and persons caused by construction faults under condition that the entire system be marked CE and only Benincá parts be used.

Sicherheitsvorschriften

- Nicht im Öffnungsbereich verweilen.
- Kinder nicht mit den Steuerungen oder in der Nähe des Tores spielen lassen.
- Bei Funktionsausfällen nicht versuchen, den Schaden selber zu beheben, sondern den Techniker rufen.

Hand- und Notbedienung

Bei einem Stromausfall oder im Falle einer Störung, kann der Torflügel folgendermaßen von Hand gesteuert werden:

- Die Schloss-Verschlussklappe nach außen drehen (Abb. A, Ref. C)
- Den speziellen Entsicherungsschlüssel (mitgeliefert) einstecken und um 90° gegen den Uhrzeigersinn bei linkem Motor oder im Uhrzeigersinn bei rechtem Motor drehen
- Den Entsicherungsriff wie in Abbildung B (Ref. M) gezeigt, drehen. Der Hebel hat eine Ausgangs- bzw. Stopposition, die überschritten werden muss (Klick!), um die Mechanik zu entsichern.
- Den Hebel vollkommen öffnen (um ca. 90° drehen). Gegen Ende ist ein leichter Widerstand zu bemerken.
- Nun kann der Torflügel von Hand geöffnet bzw. geschlossen werden.
- Um den automatischen Betrieb wieder herzustellen, den Hebel in die Ausgangsposition zurück bringen und den Schlüssen um 90° drehen. Die Verschlussklappe des Schlosses wieder schließen.

Wartung

- Monatliche Kontrolle der manuellen Notentriegelung
- Es ist absolut untersagt, selbstständig Sonderwartung oder Reparaturen vorzunehmen, da Unfälle die Folge sein können; wenden Sie sich an den Techniker.
- Der Antrieb braucht keine ordentliche Unterhaltung aber es ist periodisch notwendig die Leistungsfähigkeit der Sicherheitsvorrichtungen und die andere Teile des Anlages zu prüfen. Sie könnten durch Abnutzung Gefahr hervorzubringen.

Entsorgung

Das seitlich abgebildete Symbol weist darauf hin, dass das Produkt nicht als Hausmüll entsorgt werden darf, da einige Bestandteile für die Umwelt und die menschliche Gesundheit gefährlich sind. Das Gerät muss daher zu einer zugelassenen Entsorgungsstelle gebracht oder einem Händler beim Kauf eines neuen Geräts zurückerstattet werden. Eine nicht ordnungsgemäße Entsorgung ist laut Gesetz strafbar.
